

1. `npm install -g lighthouse`
2. `lighthouse https://www.kouturecloset.com`
3. launches CHROME `https://www.kouturecloset.com`
4. After you pressed enter the chrome browser will pop up and starts with the report.

At the same time the command prompt will start listing what lighthouse is currently testing. When the report is done you'll see a link to where the report has been saved.

The Report is automatically saved as HTML in the directory you ran from.

```
/Users/scottmaretick/Desktop/KOUTURE-  
CLOSET/  
kouturecloset.com_2020-06-29_24-56-32  
.report.html
```
