75 Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

ARIAThese are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a

screen reader.

[aria-*] attributes do not match their roles

[aria-hidden="true"] elements contain focusable descendents

ARIA input fields do not have accessible names

Elements with an ARIA [role] that require children to contain a specific [role] are missing some or all of those required children.

[aria-*] attributes do not have valid values

ContrastThese are opportunities to improve the legibility of your content.

Background and foreground colors do not have a sufficient contrast ratio.

Names and labels These are opportunities to improve the semantics of the controls in your

application. This may enhance the experience for users of assistive technology, like a screen reader.

Links do not have a discernible name

Additional items to manually check (10) These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

Progressive Web App

These checks validate the aspects of a Progressive Web App. <u>Learn more</u>.

Fast and reliable

Page load is not fast enough on mobile networks Your page loads too slowly and is not interactive within 10 seconds. Look at the opportunities and diagnostics in the "Performance" section to learn how to improve. Interactive at 16.6 s

Current page does not respond with a 200 when offline

start_url does not respond with a 200 when offlineNo usable web app manifest found on page.

Installable

Uses HTTPS

Does not register a service worker that controls page and start url

Web app manifest does not meet the installability requirements Failures: No manifest was fetched.

PWA Optimized

Redirects HTTP traffic to HTTPS

Is not configured for a custom splash

screenFailures: No manifest was fetched.

Does not set a theme color for the address bar. Failures: No manifest was fetched.

Content is sized correctly for the viewport

Has a <meta name="viewport"> tag
with width or initial-scale

Contains some content when JavaScript is not available

Does not provide a valid apple-touch-icon

Manifest doesn't have a maskable iconNo manifest was fetched

Additional items to manually check (3) These checks are required by the baseline <u>PWA</u>

Checklist but are not automatically checked by

Lighthouse. They do not affect your score but it's important that you verify them manually.
